## PHP WEB/SOFTWARE DEVELOPER (LAMP) JOB SUMMARY AND DESCRIPTION

---

### **COME AND BE A PART OF OUR EXCITING CORPORATE EXPANSION!**

#### **OUR NEED:**

We are seeking multiple developers from entry to senior level, who are passionate about developing, and have a strong interest in creating unique, innovative, and ground breaking back-end code. As a web developer you will possess the ability to produce clean, well-documented, efficient and standard-compliant code along with an eye toward performance optimization.

#### **WHAT YOU'LL DO:**

Improve and define our development methodologies, processes, and systems

Web development in PHP/Java/MySQL/XHTML

Maintain web-based applications which streamline business processes.

Work with database driven dynamic web content.

Organize information and use design skills to create visually appealing and functional user interfaces for web applications

Creativity, attention to detail, and self-discipline is essential for this fast-paced position as you must be able to transform complex ideas and requirements into meaningful, highly functional, and professionally formatted code

#### **THINGS YOU KNOW/HAVE DONE:**

Experience in team-based web development

Strong determination, and a superb team-ethic

Experience with coding PHP and utilizing PHP frameworks

Experience with version control tools, such as Git

Working knowledge of WordPress or similar CMS, including module development

Experience with JavaScript, HTML, CSS, Dojo, AJAX and XML.

Experience working in a Linux/Unix environment

Demonstrated ability to conduct analysis to achieve efficiency and effectiveness of both new and existing systems.

Experience with web based application development

Working knowledge of APIs, EDI, and web services

Familiarity with the Agile development methodology

Eye for detail and consistency

Able to work independently as well as in cross-functional teams

The ability to manage deadlines and produce products given a quick turnaround

#### **THINGS THAT WILL IMPRESS US:**

Bachelor's degree, or equivalent combination of education and experience preferred

3+ years of experience developing PHP/MySQL websites and/or enterprise applications

Deep experience with at least one PHP development framework (Symfony, CakePHP, etc.)

Experience with Mongo DB

Experience with various enterprise-level CMS platforms

A background in object-oriented design and development strategies

Experience with Service Oriented Architecture

Strong background in hand-coding advanced HTML and CSS in addition to solid JavaScript/jQuery/Dojo skills

The proven ability to develop web pages utilizing HTML, CSS, and JavaScript

The ability to deal with cross-browser compatibility issues

### **THINGS THAT WILL IMPRESS YOU:**

For your contributions, you'll enjoy the sweet perks of an employee discount program, also a benefits package that is available after 60 days of employment which includes:

- Medical
- Dental
- Vision
- Paid Time Off
- 8 Company Paid Holidays
- Flexible Schedules
